EDUCATION AND HONORS

ILLINOIS INSTITUTE OF TECHNOLOGY, CHICAGO, IL (USA) *August* 2022 – May 2024

Master of Science in Data Science

Skills learned from Relevant Courses: Machine Learning, Database Organization, Big data, Statistical Learning, Public Engagement Scientists, Data Preparation and analysis, Probability and Statistics, Statistical Modeling, Data Mining, Predictive Modeling

PUNE INSTITUTE OF COMPUTER TECHNOLOGY, PUNE, INDIA *August 2016 – October 2020*

Bachelor of Engineering in Electronics and Telecommunication

Relevant Courses: Artificial intelligence, Data Structures, and Algorithms, Digital Image Video Processing

SKILLS

LANGUAGE: Python, R, C, C++, MATLAB, Java
CLOUD PLATFORMS: AWS, Google Cloud
DATABASE: SQL, Postgres SQL, Relational Database Management, Excel.
OS / Tools: Linux, Git, LaTeX, Bitbucket, Tableau, Hadoop
FRAMEWORKS & LIBRARIES: NumPy, OpenCV, Matplotlib, Pandas, Seaborn, TensorFlow, Keras, Scikit-Learn, PySpark

EXPERIENCE

Data Analyst *Oct* 2022 – Sept 2022
GlobalShala Solutions Chicago, IL (US)

• Worked with the Artificial Intelligence team on a project to resolve the problem of data privacy while training machine learning models. Project Management Strategy: Agile Project Management
• Successfully implemented machine unlearning model using convolutional neural network (CNN).
• Generated analytical insights through pandas and scikit-learn by sampling the dataset and testing on the same

Software Engineer *Oct* 2020 – July 2022
Larsen & Toubro InfoTech Limited Pune, Maharashtra (India)

• Worked as Software Engineer for Travellers for 1.5 years on Premium Pipeline project
• Involved in tuning long-running SQLs, analyzing AWR reports and execution plans to increase performance
• Successfully implemented controls for Suspense resolution, Policy Loading, Transaction control,
• Wrote batch script to Automate SQL jobs execution and Managed it using Autosys, Monitored health via Dynatrace.
• Also worked with the implementation of Analytics Tool in QlikView.
.

PROJECTS

• **WIRELESS SCROLLING DISPLAY** *June* 2018 – *February* 2019
• lead a team of 3 to build this model and worked on the app development and Programming part of system.
• Worked on ARDUINO, MPLAB, and EAGLE software to program & design an efficient electronic circuit.

• **Object Detection in Aerial Imagery Using Deep Learning** *August* 2019 – *May* 2020
• Employed algorithms of aerial image processing to solve vehicle detection problems with accuracy of 92.6%.
• Collected Dataset from MUNICH and Overhead database, Labeled and categorized the data for data processing of the model.
• Developed a simulation tool with free-hand designing and hyperparameter tuning for visualisation of neural network

• **Emotional Sentiment Analysis using AWS** *August* 2022 – *December* 2022
• Analyzed various services of AWS for implementing machine learning models, gained hands-on S3, EC2
• Implemented and compared few NLP models using AWS Sagemaker and Spark.
• Designed and analyzed learning models like: BlazingText, BERT, RoBerta, RNN.
